The cloud for modern business.

Reduce costs by up to 50% on key cloud workloads

Microsoft Azure is transforming how businesses consume IT today by offering consumption-based resources that can scale up or down, as needed. As a Microsoft Partner, Vertikal6 can assist you in moving your data to the cloud.

Save time, money, and effort on data back-up, disaster recovery, and security management workloads.

A recent McKinsey study found that SMBs are able to reduce costs by as much as 50% by moving to an Infrastructure-as-a-Service solution. And, according to AMI research, roughly 25% of small businesses and 50% of mid-size businesses plan to shift their budgets to more cloud spending. Here are a few easy ways to get started:

Data Back-Up – Protect your data and applications with Azure to avoid costly business interruptions or to meet compliance requirements. Securely extend your on-premises backup storage and data archiving solutions to the cloud—reducing cost and complexity, while achieving efficiency and scalability.

Disaster Recovery – Even a minor outage can put you at a competitive disadvantage. Be ready with a business continuity plan that includes disaster recovery for all your major IT systems—without the expense of secondary infrastructure.

Security – With an increase in security breaches and cybercrimes, companies are rightfully concerned about the security of their data in the cloud. Azure has several industry-leading options for managing and monitoring your assets.

### WHY AZURE?

No infrastructure to buy, manage, upgrade

Right resources when you need them

Get apps & workloads up and running fast

Easily scale up, down or out

Only pay for what you use

Your Data Center on Demand

Azure

Storage, Backup & Recovery Services

Indentity & Access Management

Database Services

SQL

Cloud Computing

Application Hosting, Development, Testing

WHERE STRATEGY ELEVATES TECHNOLOGY

Microsoft Azure is your data center on demand, your IT infrastructure in the cloud.

Move faster, do more, save money with Microsoft Azure:

Broadest choice of infrastructure
and platform services in the cloud.

Easy setup and management
with an online, all-in-one portal.

Open platform with support for almost any OS, workload, tool, language.

Largest network of global datacenters
100+ in 40+ countries.

True hybrid capabilities
what you want, when and where you want.

Proven enterprise-grade
security, privacy and compliance.

Scale on demand, pay as you go
with no upfront costs.

Hyperscale, Hybrid, On Demand

· Extend data center/IT Infrastructure to the cloud
· Easily expand your services to new regions

· Open, flexible cloud platform
· Any workload, tool, language
· Integrates with existing IT
· Hybrid or full cloud computing

· Virtual machines, apps, sites, databases up in minutes
· Quickly transition workloads and apps to the cloud
· Easily develop, test and run apps

· Simple, flexible tools and management portal
· Proven enterprise-grade data protection, security and privacy
· 99.95% SLA uptime
· Industry-verified, global compliance standards

· Pay as you go – only for what use
· Add, stop, scale services anytime

Let's discuss how we can move your data to the cloud.
